HOW TO SAVE MONEY AT THE FOOD STORE

This sounds like a hard job to do since we all like to eat and eat regularly. But it can be done. There are so many ways to feed a family well, and to do it on less money than you are spending now.

The way to get your biggest value for your food dollar is to have a list of definite needs and spending limits established. Therefore, it is smart to plan meals ahead, so that you won't be tempted to suggest eating out because "there's simply nothing in the house."

Shop for specials. Grocers entice us into their stores with specials, some of them at cost or even under, in hopes we'll stop to buy the specials, then stay to buy the week's supplies. Usually we do and it's good practice, because it saves us the time of making extra trips.

Stock up on weekend specials. One of the best ways to make the home freezer pay for itself is to buy enough on special to last awhile. But don't get carried away with bargains and buy too much.

Buy big items. Buy groceries in quantity only if you have storage space. It may take a while to figure out how much you're paying per ounce on a certain size, but if you have a cabinet shelf high enough to hold it, you can bet the big box is the bargain.

Other ways to help save money is to buy to grade some of the time, be flexible in your food plan, and use convenient foods and save more by cooking more. Yes, that's true. The more you cook, the more you save on unplanned last-minute heat-and-eat and fried meat meals with needless sauces and ready-made mixes that take greedy bites out of the food dollar.

Saving time - I've talked a bout saving money and let's save a little time. Making donuts, pies, and casseroles with the extra portion going into the home freezer. If possible, in containers that can be heated in the oven. Soups, meat loaf, chili, corn, meat sauce are nice to have on hand. And so are homemade rolls, bread and cookies.

Let's be sure we spend money on food. According to the USDA, 20¢ of every \$1.00 goes for food. This 20¢ is not meant to take care of dog food, toothbrushes, records, canteens, school supplies and garden tools. If your food dollar is not working out that way, maybe you should take the time to do a little re-adjustment in his figures to allow extra for those necessities.

Shop for specials. Grocers entice us into their stores with specials, some of them at cost or even under, in hopes we'll stop to buy the specials, then stay to buy the week's supplies. Usually we do and it's good practice, because it saves us the time of making extra trips.

IT'S THAT TIME AGAIN - Seeing sales and sales of cotton that is right today at the Elba gin. The Elba Shutter Bug caught this picture with the children along with the 1st bale of cotton to be ginned this season in this area. Standing is Sam Devane, age 3, son of Mr. and Mrs. James R. Devane. Shutter Bug is Gypsy Morrow, age 1, and Gypsy Morrow, age 3, children of Mr. and Mrs. Luke Jabert Morrow.

Voters must re-identify themselves if they wish to continue to vote.

New officers for each club will be elected by the members in September. Any boy or girl between the ages of 10 and 21 years of age may become a member. Each member should attend the regular club meetings if at all possible. All members must take some type of project. Some of the projects 4-H girls work on are:

1. Clothing construction, repairs, care and selection of clothes.
2. Foods and Nutrition Food preparation, selection and use of food.
3. Home Improvement.
4. Safety.
5. Beautification of home grounds.
6. Child Care.
7. Canning foods.
8. Preserving foods.
9. Beef Calf.
10. Poultry.
11. Recreation.
12. Chores.

There's a saying that you're not a real gardener until you can grow plants from seed in desirable plants ready for transplanting.

And August is an ideal month for planting ponies (and other perennial flowers) because there's plenty of time before frost to get seedlings developed and hardened before cold weather. Why not buy some fresh seed and try your luck?

Here are some guidelines that will help insure success. Plant the seed in seed flats or pots containing a well drained soil - one-third sandy loam, one-third clay loam and one-third organic matter should be adequate. For the organic matter, you can use any one of several materials. Many gardeners prefer peat moss. Let's hold on well rotted stable manure.

Next, remove all clods or debris from the soil. When it's placed in the pots or flats, level the soil and by the 4th row about an inch and one-half inch deep. Since seed are very small, plant them on the surface.

Some people have had a great deal of success placing a thin layer of moistened shredded sphagnum moss over the planted seed. Whether or not you use the moss, keep the soil moist at all times, though not saturated. A glass or plastic cover over the seed flat or pot will insure uniform humidity.

Place the seed flat in a shady spot until the seeds have started germinating, then after during hot, dry weather, you'll need to check the plants fairly often. Gradually ventilate the flat by raising the glass or plastic a little each day until it can be completely removed.

Once the plants reach a two seedling leaf stage, transplant them into pots, flats or beds where they will have more room to develop into healthy, bushy plants. If you keep them moist, well fertilized and free from insect diseases apply liquid fertilizer. Here are some other gardening activities which should be done this month.

1. Boron On Root Crops: Crops such as carrots, beets,

turnips, radishes, broccoli and cauliflower are extremely sensitive to boron deficiency in the soil. The deficiency shows up as a dark discoloration or cracking inside the root or stem of the plants. To prevent this condition use two tablespoons of borax per 100 feet of row. Mix the borax in the fertilizer and apply in the row before planting these fall crops.

2. Clean Up The Home Orchard: Many insects and diseases are carried over from one year to the next in mummified fruit and dead or broken branches on fruit trees. Be sure to pick up all rotted fruit especially peaches, and carry them out of the orchard to prevent brown rot the following year. Also, cut out and burn all dead or broken branches to prevent a build up of shot hole borers and other insects.

3. Soil Test: If you're planning to establish a lawn this fall, be sure to soil test now. Containers and instructions are at your county agent's office.

4. Landscape Planning: Since August is a slack month for garden chores, why not plan a landscape design for your home grounds? This is especially true with new home owners. Basic shrubs are generally planted around the foundation of the house when it is completed. However, additional shrubs are usually needed to produce an attractive setting for the home. Make a rough sketch of the house and grounds, then place shrubs, flower beds, etc. on the drawing. By doing this now, you'll be ready for planting in early fall.

5. Watering: August is generally a critical month for most plants. Kinds of plants that shrubs and flowers. And remember the rules for watering: don't overwater.

6. Household Insects: Now is a good time to clean up around the house and apply an insecticide to prevent ants, roaches and other insects from entering the house this fall. Several materials have given good results when used as recommended. I would suggest the dust and granules, or 5 percent dieldrin or heptachlor dust and granules. Nothing ruins a gardener's good intentions like 90-degree

temperatures. Nevertheless, there are some activities that need attention now.

First, keeping plants free of weeds and insects is of major importance during middle and late summer. And if you live in an area that hasn't received much rain this summer, watering is necessary to keep the plants strong.

Roses, especially, require tender loving care this month to produce good blooms this fall. You'll probably need to put in another application of a commercial rose fertilizer, or if you prefer, a complete balanced garden fertilizer will be adequate. To prevent leaf spot from playing havoc with the rose foliage, put on an all-purpose rose dust or spray.

BULBS APPEARING
Some garden centers are receiving their first shipments of bulbs for fall planting. Those which need early planting are crocuses (Red Spider Lily), zephyranthes (Fairy Lily), colchicum and madonna lily. For best results, prepare the soil thoroughly and follow the bulb producer's planting directions.

Good Sanitation
Can Control Flies
Claims Farm Agent

At this time of the year, adult population of houseflies, hornflies, and stable flies are at a peak. However, these insects can be controlled with

good sanitation and the use of recommended insecticides according to H. B. Thompson, Assistant County Agent.

Do not allow any fly breeding material to accumulate. Watch for wet accumulation of feed, silage, straw, and even manure soiled grounds near the barns. Remove all such potentially fly breeding sources.

As you know, only certain insecticides can be used in certain areas on a dairy farm. To assure pesticide residue free milk, use only the materials known to be safe.

Should you desire additional information concerning these pests or other cattle pests, call or come by the county agent's office.

COFFEE CONSUMPTION in our country is over 136 billion cups a year, more than four times that of 1920. . .

COFFEE COUNTY Livestockmen Sell Wares To Market

ELBA, ALA.—Coffee County livestockmen have something to say about selling their wares. They operate a livestock market themselves.

It's officially called the Coffee County Farmer's Livestock Cooperative. Farmers all over the county and those from adjoining counties can use the facilities of this market which holds auction sales each Thursday.

Livestock buyers, brokers and packers are encouraged to participate in the market and from all indications they're on hand for every sale.

Beef and hog producers throughout the area recognize the importance of the nearby market and are trying to produce enough livestock to furnish buyer demand reports County Agent J. R. Speed.

By participating in the cooperative selling program, livestock producers get a dividend each year. The more a farmer participates, the more dividend he gets.

"Farmers are very happy with this setup," adds Speed.

They are assured of getting top prices for their hogs and cattle and they profit from operating their own market.

The market is under the cooperative charter of the State Department of Agriculture and Industries. The market manager is Carlton R. Larkins on Elba Rt. 2 farmer; the auctioneer is Fred Rhodes.

Some garden centers are receiving their first shipments of bulbs for fall planting. Those which need early planting are crocuses (Red Spider Lily), zephyranthes (Fairy Lily), colchicum and madonna lily. VIEWS... OF THE NEWS...

BY J. L. KIMBRO

DANGER ON THE SUPREME COURT'S BLIND SIDE

I believe that most of the people are bitter against the Supreme Court's prayer ruling. But there are some who agree with the finding of the Court. Parents who have had their children taught differently in school to the way they have taught them, generally are in agreement with the Court's decision. These parents have had their children come home from school haggled and greatly embarrassed after being intimidated by their overzealous teachers and willing school mates and they think that the Court's ruling may save them some much-wanted relief. Parents with aching hearts are apt to welcome any action that will put a stop to the thing that has given them this trouble without thinking much about the danger that may lurk on the opposite side.

It is definitely wrong and unconstitutional to require any religious service of children in school which in any manner conflicts with their own or with the religious beliefs of their parents. Since so few people understand the other person's religious views, and may even hold his neighbor's religion in contempt and rate every belief but their own as similar views as worthy only of annihilation, few are likely to realize it when they are trespassing and imposing upon others. People who are members of the most popular churches are apt to be the chief offenders in this respect. Those who do it usually are full of self-righteousness and blind and insensitive to true religious liberty. The majority

Dyess To Receive Master of Education Degree At Auburn

AUBURN — Kenneth King Dyess of Elba will receive the 557 degree earning candidate at Auburn University on Friday.

Dyess is a candidate for the Master of Education Degree. The degree candidates, their parents and friends will be guests of President and Mrs. Ralph B. Draughon for a graduation coffee in the Auburn Union, 11 A. M. to 1 P. M.

Earlier, 39 young officers in the Army, Navy and Air Force will have been commissioned from the three ROTC units.

Commencement speaker at 5:30 P. M. in Cliff Hare Stadium is to be Doctor Noah Langdale, Jr., president of the Georgia State College of Business Administration.

Your Health

"YOUR HEALTH" IS PRESENTED BY YOUR PHYSICIAN. SERVICE OF THE MEDICAL ASSOCIATION OF THE STATE OF ALABAMA.

PHYSICALLY HANDICAPPED

One of the joys for many physically handicapped individuals is swimming. In water, the arms and legs can move with little effort. To swim about in freedom and security without the impediment of braces, crutches, or wheelchair is a glorious experience for the handicapped. In the water, physical differences are not so obvious to others; and many handicapped people can acquire enough swimming skill so that they are able to participate in an activity along with normal persons.

Swimming programs for the physically handicapped have been carried on for years throughout the country. Many of these programs have taken place at summer camps for the handicapped and some Y. M. C. A. and Y. W. C. A. camps.

The Home Corner

REFINISH FURNITURE
IN YOUR SPARE TIME

Does an old chair or table in your home need a new finish? If it does, chances are you can fit it in your spare time.

A good refinishing job can restore both the usefulness and beauty to many old pieces of furniture. But only furniture of good lines and construction are worth the time, money and effort needed to do a good job.

Chemical mildew inhibitors which can be bought at drug or grocery stores will help out if you're having trouble with mildew molds.

B. B. writes: It seems to me the greatest collection of All-American college football backs were those selected in 1929. Would you recall these players for us young old-timers?

A. This should bring back memories. The great All-American backfield of 1929 had Tom Harmon of Michigan, Nile Kinnick of Iowa, John Kimbrough of Texas A&M and Paul Christman of Missouri.

From R. K.: Which heavy-weight boxing champion defended his title the most times?

A. Joe Louis. He set the record with 25 defenses.

P. G. F. writes: What's Mickey Mantle's first name?

A. Mickey. It's not a nickname. His real name: Mickey Charles Mantle.

From several readers: Which college has won the Rose Bowl the most times?

A. Southern Cal. Since Alabama ranks second with four wins.

L. A. Zaskes: Where will last year's top college football stars be playing this year?

A. Taking 1961's first-team All-America backfield, Sandy Stephens will be in Canadian pro ball, Ernie Davis and Bob Ferguson will be in the National Football League—Davis at Cleveland, Ferguson at Pittsburgh, and Jim Saxon will play for Dallas of the A.F.C.

He is married to the former Sarah Stanley of Miami. The couple resides with their two children, John and Stanley, at apartment B-13 A Northington.

For easy-to-see carrying boxes, save your plastic zipper containers and pill bottles. These are also handy containers to use in sewing boxes and bathroom medicine cabinets.

ASK ME

By Chuck Reichblum

K. W. asks: Have there ever been any great LEFT-HANDED golfers?

A. No lefty has ever won a major golf tournament. Why? Former Open champ Ed Furgol told me, "Golf seems to be a right-handers game because of the architecture of courses and unavailability of equipment for left-handers." Some great golfers like Ben Hogan were natural lefties, but converted to play right-handed.

To give you an idea what the job is like, the home furnishings specialist offers these guidelines.

REMOVE OLD FINISH: For a successful job, carefully and thoroughly remove the old finish, then sand the surface.

Apply a paint or varnish remover as directed on the container. Remember, though, that many removers are flammable and others produce toxic fumes. So play it safe and have adequate ventilation.

A. This should bring back memories. The great All-American backfield of 1929 had Tom Harmon of Michigan, Nile Kinnick of Iowa, John Kimbrough of Texas A&M and Paul Christman of Missouri.

From R. K.: Which heavy-weight boxing champion defended his title the most times?

MILDREW MOLDS: A SUMMER NUISANCE TO HOMEOWNERS

Hot, damp and dark - this describes the living quarters of one of the homeowners' summer dreads - mildew mold. But the ideal setting for the growth of this mold can be prevented, states Kathleen Thompson of Auburn University.

During damp weather, try to keep closets doors open and leave space between hanging clothes. It's also a good idea to open outside doors and windows if possible and run an electric fan to circulate the air when outside air is dry.

Chemical mildew inhibitors which can be bought at drug or grocery stores will help out if you're having trouble with mildew molds.

FARM NEWS

SOIL CONSERVATION NEWS

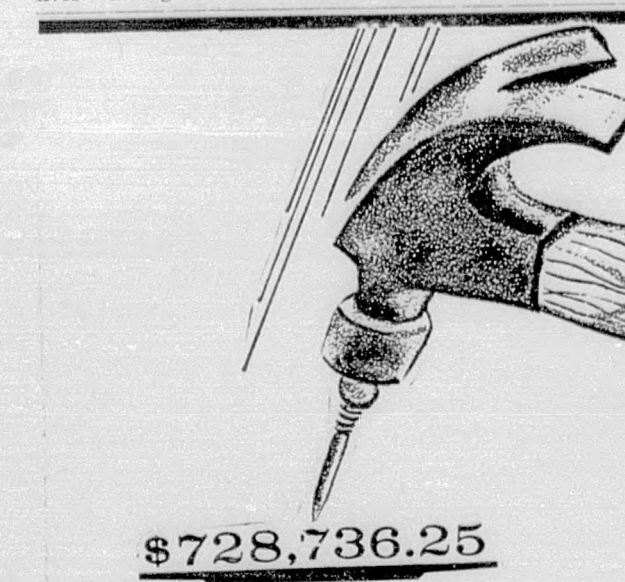

BY L. P. GREGORY, JR.

SOIL CONSERVATION SERVICE

DRAINAGE DITCHES

J. D. Whitman of Elba has completed the construction of 2115 feet of field drainage ditches on his farm on Taylor Mill Road. These ditches will drain five acres of bottom land that has been too wet to produce good pasture. The area drained will be prepared and planted to pasture.

Whitman is also planning to renovate 32 acres of old pasture this fall. After turning the old sod and preparing a good seed bed, these acres will be planted to a small grain and clover combination for winter grazing. Next Spring the Bahia Grass pasture will be planted to the seed now on the land and from the old plants that have been growing through the winter of this season.

\$728,736.25

Nailed down as the amount of money spent in building and substation construction in 1961 by Alabama Rural Electric. Money like this means more jobs and profits for Alabama people... meaning you are "better off" because today's farms have electricity.

AGRICULTURE MAY NEED TO JUSTIFY WATER USE

With the demand for water growing faster than the population, agriculture increasingly will have to justify every acre-foot of water it uses, warned Doctor Byron T. Shaw, Administrator of Agriculture Research Service, International Seminar on Water and Soil Utilization, recently.

"Agriculture has so far had first call on the nation's water supplies and has been the principal user of the land re-watered," said Doctor Shaw. "This will not continue indefinitely... as pressures grow for increased industrial, recreational, and urban use of water."

Among the newer and better ways to develop additional sources of water, work to develop economical desalinization of sea water, releasing their normal water supplies for other purposes. Shaw referred to the tremendous losses of fertile farmland from erosion. "Some of our best soils lie at the bottom of the sea and in our lakes and rivers. It has been estimated that we spend the equivalent of \$600 for each acre of land that is eroded out of the Hudson River mud that was once productive farmland."

FEW PEOPLE KNOW THAT FARMING...

EMPLOYS 7.1 million workers - more than the combined employment in transportation, public utilities, the steel and automobile industries.

SPENDS \$25-\$26 billion annually for goods and services to produce crops and livestock - another \$15 billion a year for the same things that city people buy - food, clothing, drugs, furniture, appliances.

CREATES so much employment that 4 out of every 10 jobs in private employment are related to agriculture. For instance, 10 million people have jobs storing, transporting, processing, and merchandising products of agriculture; 6 million people have jobs providing the supplies farmers use.

ENABLES each of us to choose from as many as 5,000 different foods when we go to market - fresh, canned, frozen, concentrated, dehydrated, ready-mixed, ready-to-serve, or in heat-and-serve form.

BORROW - IF IT HELPS YOUR ECONOMIC POSITION. Only good reason for farm...

Its Unlawful To Release Nutria In A'bama, Says Younger

William C. Younger, Director of Conservation, has issued a regulation removing the nutria from the list of fur-bearing animals and making it unlawful to release them from captivity within the State of Alabama.

Younger stated that the nutria is not a native animal of Alabama and in areas within the state where they have been released have become a nuisance, destroying waterfowl habitat, and have proven to be of little value as a fur-bearing animal.

"It is hoped that sportsmen will encourage the taking, capturing and killing of these animals from the wilds of the state," Younger said.

DEFOLIATION OF ELMS HAS SEVERAL CAUSES

Elm trees aren't temperamental but sometimes they do get so upset they lose their leaves.

Defoliation can be caused from several things, according to J. R. Speed, County Agent. It may be due to reduced root systems caused from nearby paved areas and construction work, or damage could be caused by elm mosaic disease or a leaf-spotting fungus called Phyllosticta. All except the fungus are contributing factors, but Phyllosticta is present when the trees lose their leaves.

Affected trees will benefit from fertilizer. For best results, put any commercial fertilizer in holes about two feet apart all around the tree, under the branches about three feet from the trunk. Use two to four pounds of fertilizer for each inch of tree-trunk diameter, measured about four feet from the ground.

The Lincoln Memorial in Washington has 30 columns one for each state of the Union in 1965 when Lincoln died.

THE WOMEN BLESS 'EM. When a man answers the phone, he reaches for a pencil. A woman grabs a chair.

It is not wise to be impatient. Once you have selected a physician, give him your complete confidence. Co-operate with him by following his instructions and taking the medicine he prescribes.

YOUR DOCTOR CAN DIAL - TW 7-2407 - WHEN YOU NEED MEDICINE!

Pick up your prescription while shopping near us. A great many people entrust us with the responsibility of filling their prescriptions. May we compound yours?

What happens when you want better things in life? Do you have to put them off? Why not start saving for the future? Save with us where your savings are fully insured.

1st FEDERAL SAVINGS & Loan Assoc. of Coffee Co. Elba, Alabama

PRETTY WRAPPING - For gardening or shopping, this wrap skirt with front tie and voluminous pockets will serve you well. Trimly tailored in Seaford cotton denim, it has body enough to flare and ripple and it can be machine washed with no danger of shrinking.

Give a woman an inch and she thinks she's a ruler. . . . A joint checking account - one that lets a wife beat her husband to the draw. . . . When a man and woman marry, they become one. The trouble starts when they try to decide which one. . . . Woman may be physically weaker than man, but she can put a cap on a fruit jar so tight he can't get it off. . . . Two reasons why husbands have more wives who can cook but don't and wives who can't cook but do. . . . Maybe the girls would dress sensibly. If men noticed sensibly dressed girls. . . .

example, is about a fifth larger than average, and the nation's entire crop is expected to total nine per cent above average.

Meanwhile, the peach has changed with the times - thanks to newly developed varieties. But still there are only two classes - white fleshed and yellow fleshed. Both have varieties that are clingstone and freestone. These peaches ripen and come to market according to variety and weather conditions.

The Elberta peach, probably the best known and most outstanding commercial variety of freestone, was produced from a seed of Chinese Cling in 1879 at Marshallville, Ga. by S. H. Rumph.

About 88 per cent of the stratum 90 can be removed from milk, making it one of the safest foods in case of nuclear attack.

To clean the works of a grandfather's clock, soak a cloth with kerosene and leave it on the floor of the clock for several days. Keep the door closed. The fumes from the kerosene will loosen the velvet and make the clock easier to clean.

HOUSEHOLD HINTS

If the keyholes in your doors are hard to find in the dark, and you don't want to coat them with phosphorescent paint, coat them instead with household muck and dust with fine sand. Then you can find them by touch.

There should always be something in the center of the table besides space. A healthy house plant or a dish of fruit will catch the admiring eyes of viewers. Even small figurines make an attractive centerpiece.

Artificially breeding The number of cows in the U.S. bred artificially has climbed from 1,070 in 1939 to more than seven million in 1961.

SCHOOL DAYS - Chasde tartan plaid is a high-fashion cotton for back-to-school wear this fall. Worn by Little Miss Cotton herself, Sherry Rogers of Jackson, Miss., this dress features a ruffled bib-front and wide cummerbund. It's a low-age design.

SPECIALIST OUTLINES COST CUTTING METHODS In this world of ever-increasing prices, everyone needs some suggestions for cutting costs. And here are some methods, suggests Auburn Extension Farm Management Specialist Sidney Bell.

Put your commercial fertilizer investment where it will do the most good. When cash is limited, use fertilizer first on high value crops and look for other places to cut costs before lowering fertilizer investment.

Incentive payments instead of salaries, to hired hands might increase their performance and interest in profits. If a child is under 19, over 19 and enrolled in college, you can pay him wages for work up to \$800 and still count him as a dependent if you contribute one-half of the child's support. This would be a double exemption as a production cost and as a dependent.

When you replace machinery or equipment, a sale and new purchase can be considered depreciation costs, but a trade-in's.

So keep careful and complete records of all expenses.

Lower Costs

When you buy a Lilliston Peanut Combine or Digger-Shaker-Windrower, you've got the finest in the field. But that's only the beginning.

You've got the toughest, too. The 1962 Lilliston Peanut Combine has been acclaimed by farmers who've seen it on pre-production test runs as the finest development in peanut harvesting since mechanical combining began. It will get more peanuts with greater speed and less damage than was ever possible before. That's the way money is made.

The 1962 Lilliston 1100 Series Digger-Shaker-Windrower fits the new 4-row plantings as well as the 2-row crops. It's the best value in shakers we've ever seen - a tough, smooth, reliable performer that will give you a perfect start to a productive harvest, and keep doing it year after year.

THE WORLD'S SHORTEST alphabet is Hawaiian with 13 letters. The longest is Hindi with more than 47.

FOREIGN FAMILY TREES Four thousand years of tradition were packed into every basket of peaches sold in Alabama this year.

"Not many homemakers - or peach growers - realize it," says Dorothy Overby of Auburn University, "but this fruit was cultivated in China more than 2,000 years before Christ."

Some ancient Chinese writings referred to the peach as the "tree of life." Most Americans like the definition. We show our high regard for the peach by using it in a complimentary expression - many young ladies have a peach and cream complexion.

Peaches have a long history in America, too. The first peach trees were planted in this country before 1600 by the Spanish settlers. The first peach tree in Louisiana and the English planted them at Jamestown and Massachusetts soon after they settled.

Today, the peach ranks third among this country's tree-grown fruit. And the volume continues to grow. This year's crop of peaches in nine southern states, for example, is about a fifth larger than average, and the nation's entire crop is expected to total nine per cent above average.

Meanwhile, the peach has changed with the times - thanks to newly developed varieties. But still there are only two classes - white fleshed and yellow fleshed. Both have varieties that are clingstone and freestone. These peaches ripen and come to market according to variety and weather conditions.

The Elberta peach, probably the best known and most outstanding commercial variety of freestone, was produced from a seed of Chinese Cling in 1879 at Marshallville, Ga. by S. H. Rumph.

SCHOOL DAYS - Chasde tartan plaid is a high-fashion cotton for back-to-school wear this fall. Worn by Little Miss Cotton herself, Sherry Rogers of Jackson, Miss., this dress features a ruffled bib-front and wide cummerbund. It's a low-age design.

SPECIALIST OUTLINES COST CUTTING METHODS In this world of ever-increasing prices, everyone needs some suggestions for cutting costs. And here are some methods, suggests Auburn Extension Farm Management Specialist Sidney Bell.

Put your commercial fertilizer investment where it will do the most good. When cash is limited, use fertilizer first on high value crops and look for other places to cut costs before lowering fertilizer investment.

Incentive payments instead of salaries, to hired hands might increase their performance and interest in profits. If a child is under 19, over 19 and enrolled in college, you can pay him wages for work up to \$800 and still count him as a dependent if you contribute one-half of the child's support. This would be a double exemption as a production cost and as a dependent.

When you replace machinery or equipment, a sale and new purchase can be considered depreciation costs, but a trade-in's.

So keep careful and complete records of all expenses.

Lower Costs

When you buy a Lilliston Peanut Combine or Digger-Shaker-Windrower, you've got the finest in the field. But that's only the beginning.

You've got the toughest, too. The 1962 Lilliston Peanut Combine has been acclaimed by farmers who've seen it on pre-production test runs as the finest development in peanut harvesting since mechanical combining began. It will get more peanuts with greater speed and less damage than was ever possible before. That's the way money is made.

The 1962 Lilliston 1100 Series Digger-Shaker-Windrower fits the new 4-row plantings as well as the 2-row crops. It's the best value in shakers we've ever seen - a tough, smooth, reliable performer that will give you a perfect start to a productive harvest, and keep doing it year after year.

THE WORLD'S SHORTEST alphabet is Hawaiian with 13 letters. The longest is Hindi with more than 47.

FOREIGN FAMILY TREES Four thousand years of tradition were packed into every basket of peaches sold in Alabama this year.

"Not many homemakers - or peach growers - realize it," says Dorothy Overby of Auburn University, "but this fruit was cultivated in China more than 2,000 years before Christ."

Some ancient Chinese writings referred to the peach as the "tree of life." Most Americans like the definition. We show our high regard for the peach by using it in a complimentary expression - many young ladies have a peach and cream complexion.

Peaches have a long history in America, too. The first peach trees were planted in this country before 1600 by the Spanish settlers. The first peach tree in Louisiana and the English planted them at Jamestown and Massachusetts soon after they settled.

Today, the peach ranks third among this country's tree-grown fruit. And the volume continues to grow. This year's crop of peaches in nine southern states, for example, is about a fifth larger than average, and the nation's entire crop is expected to total nine per cent above average.

Meanwhile, the peach has changed with the times - thanks to newly developed varieties. But still there are only two classes - white fleshed and yellow fleshed. Both have varieties that are clingstone and freestone. These peaches ripen and come to market according to variety and weather conditions.

The Elberta peach, probably the best known and most outstanding commercial variety of freestone, was produced from a seed of Chinese Cling in 1879 at Marshallville, Ga. by S. H. Rumph.

About 88 per cent of the stratum 90 can be removed from milk, making it one of the safest foods in case of nuclear attack.

To clean the works of a grandfather's clock, soak a cloth with kerosene and leave it on the floor of the clock for several days. Keep the door closed. The fumes from the kerosene will loosen the velvet and make the clock easier to clean.

HOUSEHOLD HINTS

If the keyholes in your doors are hard to find in the dark, and you don't want to coat them with phosphorescent paint, coat them instead with household muck and dust with fine sand. Then you can find them by touch.

There should always be something in the center of the table besides space. A healthy house plant or a dish of fruit will catch the admiring eyes of viewers. Even small figurines make an attractive centerpiece.

Artificially breeding The number of cows in the U.S. bred artificially has climbed from 1,070 in 1939 to more than seven million in 1961.

Elba Socials

Mrs. Grace Bullard has returned to her home in Los Angeles, California, after visiting her mother, Mrs. Robbie Grantham, and other relatives.

Annette Parker of Atlanta, Georgia, has returned to her home after spending two weeks with her grandmother, Mrs. Dan Parker.

Mrs. Charles Kyle and child, Dwayne and Vickie, have returned to their home in Columbus, Mississippi, after spending two weeks with her mother, Mrs. Roy H. Moore, who lives on Troy Highway.

Mr. and Mrs. Jerry Cogan Jr., of Pensacola, Florida, and Mrs. Jerry Cogan Sr., of Providence, Rhode Island, recently visited Mrs. Cogan Jr.'s parents, Mr. and Mrs. Kermit Crook.

Mr. and Mrs. Stanley Baker, Mr. and Mrs. Ben Baker and Mrs. Arthur Johnson of Clayton, were guests of Doctor and E. M. Warr Thursday.

Mrs. L. C. McCollough, Paula Nan Smith, Mrs. Julia Moore and Jemelle Moore spent Saturday in Columbus, Georgia.

Mr. and Mrs. Carlton Whitman and children, enroute to their home in Palmetto, Florida, visited Mr. Whitman's parents, Mr. and Mrs. Flourey Whitman, last week. They were returning from New York City where they spent three weeks visiting Mrs. Whitman's parents.

Little Miss Renee Whitman, daughter of Mr. and Mrs. Travis Whitman, of Panama City, spent last week with her parents, Mr. and Mrs. Flourey Whitman.

Mr. and Mrs. Perrell Danley and children, and Mr. and Mrs. Bill Bozeman and family spent last weekend at Fort Walton Beach.

Doctor Ollie Bryan, of Lakeland, Florida, visited Mr. and Mrs. T. B. Bryan and Mrs. Sam Young last week.

Mr. and Mrs. Barney Manning and family have returned from a visit to Mrs. Manning's relatives in Oregon.

Mrs. Murdock of Enterprise was a weekend guest of Mrs. Grace Canley.

Mr. and Mrs. Lister Brunson and children, Alice, Will and Betsy, and Mrs. Murrell Jones and children, Phil and Ann, English, spent last weekend at the Brunson's beach cottage at Sunnyside, Florida.

Mrs. Buck Smart, Mrs. George Williamson, and Joan King spent Sunday with their mother and grandmother, Mrs. Strickland, at the Opp Rest Home.

Mr. and Mrs. Jeff Bryan spent the weekend in Mobile. Their son and family, Mr. and Mrs. Charles Bryan and children, spent in New Orleans, met them there for a brief visit.

Mr. and Mrs. L. J. Bailey of Montgomery visited his mother, Mrs. Louise Bailey, last week.

Mr. and Mrs. Bobby Hudson and son of Montgomery were weekend guests of their parents, Mr. and Mrs. Randall Hudson, and Mr. and Mrs. R. C. Grantham Sr.

Mr. and Mrs. Clo Hawkins visited Mr. and Mrs. William Henry Prescott at Melbourne, Florida, Bill and Steve Prescott returned home with them after spending two weeks visiting relatives here.

Rodney and Cindy Woodham of Florida spent the weekend with their grandmother, Mrs. Dan Bowdoin.

Warren to Graduate

William H. Warren will graduate along with one hundred and forty-three seniors at Howard College which will be held at the Dawson Memorial Baptist Church in Homewood, Friday, August 24 at 7:30 P.M. Warren will receive the Bachelor of Science degree in Religion.

Overseas homemakers seem to like U.S. poultry. Exports of fresh and frozen poultry have increased almost five fold in the past four years.

National Security Team Defeat Sneakers In Ladies League

On Wednesday afternoon, August 15, the ladies on the National Security team defeated the Sneakers on top with a score of 15-11. The only home run in the game was made by Olive Canley for the losers.

In the Ladies' League, the record now stands with Ruthie Gordon's Sneakers on top with 4 wins and 1 loss. Gloria Burdick's Stumblers are in second place with one victory and three losses. Jean Kennett's National Security team is in third place with one win and two losses.

The National Security team played the Stumblers Tuesday night, August 21, but a report has not been made of the results of that game.

Bonnie Taylor HD Club Enjoys Annual Picnic Friday Night

The Bonnie Taylor Home Demonstration Club held its annual picnic Friday night, August 10, at the Elba Pool.

A delightful supper of fried chicken and all the trimmings was served. After all the guests arrived the president, Mrs. Haywood Taylor, gave an interesting talk. Elmer Taylor returned thanks.

Forty-five persons enjoyed the supper. All the members were present except two. Those who attended and their families were Haywood Taylor, Elmer Taylor, Bonnie Taylor, Elmer Taylor, Shirley Carpenter, Mr. and Mrs. Lamar Wilson, Hershel Taylor, Lester Kelley, Hollis Kelley, Everett Kelley, Jay D. Hudson, Randall Hudson, Edd Hudson, Clifton Boutwell and Mary Helms. Visitors included Mrs. Via Hudson, Mrs. Kelley and Mrs. Bernice Wesley.

Mr. and Mrs. Jim Whitman went to Durr's Christmas Show in Montgomery Friday.

Mrs. Bessie Bullard visited Mr. and Mrs. Marvin Hall in Montgomery Sunday night and Monday.

Mrs. Cecil Prescott and Mrs. J. W. Kendrick were guests of Mr. and Mrs. Sam Casey in Dothan Monday.

Earl Hudson of Clayton is visiting his brother and sister-in-law, Mr. and Mrs. Jimmy Hudson, and Mr. and Mrs. Cecil Prescott.

Miss Zeddie Rowe and Mrs. Benny O'Neal of Andalusia visited Miss Elizabeth Rowe in Montgomery Friday.

Clai and Robert Prescott of Montgomery spent the weekend with their mother and grandmother, Mrs. Strickland, at the Opp Rest Home.

Mr. and Mrs. Buren Wise have returned to their home in Columbus, Mississippi after visiting his mother, Mrs. Dock Wise, and his brother and family, Mr. and Mrs. Cecil Wise.

Mrs. Coston Pearce, Linda Pearce, Margaret Kendrick and Minette Brunson, visited Mrs. Pearce's relatives in Miami, Florida, last week.

Mrs. L. J. Dismuke of Elba, Mrs. H. D. Garner of Florida, Mrs. P. M. Cain of Panama City, Mrs. Vester Gamble of Florida, and Mrs. Willie Mae Whitaker of Headland, have returned from a week's stay at Ridgecrest, N.C.

Mr. and Mrs. L. J. Dismuke and family returned from Bradenton, Florida, where they accompanied the Dawson Memorial Baptist Church in Homewood, Florida, where she will teach at the Montrose Junior College. They left Elba Sunday, August 12, and returned last Friday.

Mr. and Mrs. James Boswell and Keith, and Mr. and Mrs. Everett Kelley and children, spent the weekend at Sunnyside Beach, Florida.

VOLUME 65

"Save The U.S. Alabama", Retired Naval Battleship

Injured Brothers Flown To Medical Facilities By Army Helicopter

Two Marietta, Georgia, brothers were flown to a Fort Rucker based helicopter from the Geneva County Hospital, Geneva, Alabama, to Kennestone Hospital in Marietta Monday for advanced medical treatment.

The lads, Ralph Johnson, 18, who is in critical condition with multiple fractures and lacerations, and Gene Johnson, 19, who is in fair condition, were hurt in a head-on collision near Geneva Sunday morning.

The U. S. Navy has "retired" the 29-year-old battleship and plans to sell her for scrap next spring.

"I believe the U.S. Alabama should be saved from the scrap heap and brought back to our state as a lasting memorial to all those who served their country in World War II," Governor Patterson said this week.

The people of Alabama, future generations included, have every right to be proud of the gallant war record of this famous fighting ship.

The battleship is now berthed in a Navy "mothball fleet" at Bremerton, Washington. Although the Navy is willing to donate the ship to state authorities "as is where is," the cost of towing the big vessel to Mobile, acquiring a berthing slip and preparing the ship for public visiting might approach \$500,000.

The Navy, meanwhile, has agreed to hold up on plans to scrap the ship until the newly-appointed committee investigates the possibility of organizing a statewide "Save The U.S. Alabama" campaign.

Named as chairman of the U.S. Alabama Committee was Henri Aldridge of Mobile, an International Paper Company executive.

Members of the state committee include Attorney William H. Brantley Jr. of Birmingham, representing the Alabama Bar Association; Dan W. Gray of Anniston, Association of County Commissioners; Ed E. Reid of Montgomery, Alabama League of Municipalities; W. C. McGrath of Mobile, Alabama Travel Council; F. E. Busby of Dothan, Alabama Broadcasters Association; William Stewart, publisher of the Monroe Citizen, of Monroeville, and Louis Eckl, publisher of The Florence Times, Florence, representing the Alabama Press Association; John M. Ward of Montgomery, State Chamber of Commerce; City School Superintendent; Vernon S. John of Opp, Alabama Education Association; Ross of Wolterline Tube Division, Decatur, Associated Industries of Alabama; Lewis McCray of Tuscaloosa, American Legion; Franklin J. McCarty of Russellville, Veterans of Foreign Wars.

P. S. Jackson of Peterman, Alabama Bankers Association; Alfred F. Delcamp of Mobile, Mobile Area Chamber of Commerce; Bob Harper of Montgomery, State Bureau of Publicity and Information and three state legislators — Senator-Elect John Tyson of Mobile, and Representatives Ira Fruit of Livingston and John Hawkins of Birmingham.

Also appointed was Charles L. McCafferty of Selma, comptroller for Alameda Metals Company and a former crewman aboard the U.S.S. Alabama.

A new feature will begin to appear in The Clipper next week entitled, "Through The Keyhole," by Mrs. Robert Cannon. This feature will not take the place of any other person already writing for The Clipper but will be an additional feature.

Mrs. Will Kendrick will continue to be Special Editor and all such news is to be telephoned to her or The Clipper office. Mrs. Cannon's column is something of an informal nature, but will deal with social events, mid-life news, unusual events, special events and a varied coverage as well as some personal opinions.

"Through The Keyhole" was a feature in The Clipper several years ago and was created among a lot of readers.

Attention is called to the list of voters in the special section of this newspaper which will be purged from the list of qualified electors of Coffee County if they fail to reidentify themselves before October 1st.

It is much simpler to fill out the reidentification papers than it is to have to fill out new registration papers. Forms for reidentifying are simple and can be filled out and signed within minutes after they are requested by electors.

The persons whose names are listed on the special elector's purge list section, which are according to registration records in the office of the Judge of Probate, have not reidentified themselves according to Act No. 307 of the 1959 Legislature.

It is urged that those whose names appear in the special elector's section go to the Probate Judge's Office or meet with the Board of Registrars on or before October 1st and reidentify. Unless that is done, those who have failed to reidentify will be omitted from the list of voters in this county.

Members of the Board of Registrars are J. W. Parker, Chairman, Estelle Morgan, and Quinette R. Whitman.

Miss Jones is a member of the Baptist Church and sings in the choir.

Miss Jones graduated this past Spring from the University of Alabama with a degree in home economics. While at the University, she was a member of the Agnes Ellen Harris Home Economics Club and a member of the Alabama Public Relations Council.

Her duties in Tallapoosa county will be mainly with the county 4-H Club program, but she also will work with other phases of the home economics program of the extension service. Miss Jones is a graduate of Kinston High School in Coffee County, class of '59.

While in high school Miss Jones was a member of the FFA, Beta Club, Glee Club, and a member of the Home Economics Club. She was a Coffee County 4-H talent winner and went to Auburn to enter the state 4-H club talent contest that year.

Miss Jones is a member of the Baptist Church and sings in the choir.

ELBA, ALABAMA, THURSDAY AUGUST 30, 1962

NUMBER 14

American Legion Of Alabama Wages War On Communist Threat

The American Legion of Alabama has announced an all-out drive for 111,111 members. This is the largest goal ever set in the history of the Legion in Alabama since its beginning in 1919. The announcement came from the State Commander Raymond Weeks of Birmingham, who said in "The goal we have set for 111,111 members is an ambitious and challenging figure which we expect to reach by January 12, 1963. There are more than 300,000 veterans in Alabama who are eligible to belong to the American Legion and we expect to reach 'one million three hundred and thirty-three thousand three hundred and three' members in the organization."

Weeks pointed out there is a direct threat by the Communists of our very existence, and the American Legion in Alabama will lead the fight to rid our state of this scourge which threatens our way of life.

The American Legion in Alabama is divided into ten districts each headed by ten District Commanders. The districts are divided into zones with a Zone Commander as head. There are from 4 to 7 legion posts in each zone. The state at large is divided into 3 areas: Southern, Central and Northern, which is headed by a Department Vice Commander.

There are from 4 to 7 legion posts in each zone. The state at large is divided into 3 areas: Southern, Central and Northern, which is headed by a Department Vice Commander.

SACRED HARP SING — Pictured at top is a scene inside the Bethlehem Church, 7 miles south of Elba of the east side of the river, Sunday, while the sing was in session. Picture was taken immediately after the sing went back into session after lunch. Bottom photo is several citizens who attended the sing but did not return to the building after the lunch on the grounds. They are from left to right: Mrs. M. S. Davis, Mrs. C. E. Davis, Mrs. W. G. Hataway, Mrs. W. C. Hataway, Mrs. J. L. Davis, all of Route 2 Elba, and Harold V. Davis of Montgomery. All are related.

Aircraft Mechanics, Technicians School Opens In Ozark

Space age training for the aircraft industry becomes available September 4, with the 231, south of town. The building houses administrative offices, classrooms, fabric and framing areas, hangar space, and testing areas.

The graduates and their guests heard an address by one of the space age's noted experts on rocketry, Doctor Ernest Stuhlinger, Director, Research Projects Division, Marshall Space Flight Center.

Following people were candidates for degrees from Coffee County.

ELBA — James E. Grimes, BS, C&BA; Fred K. Ham, BS, C&BA; John E. Morrow, Ph. D., Secondary Education; Herbert B. Ringsdorf, BS, in Chemistry.

ENTERPRISE — Herbert T. McEachin, BS, C&BA.

KINSTON — Peggy J. Gooden, BS, Education.

Voters Purge List Published In Coffee's Papers

Attention is called to the list of voters in the special section of this newspaper which will be purged from the list of qualified electors of Coffee County if they fail to reidentify themselves before October 1st.

It is much simpler to fill out the reidentification papers than it is to have to fill out new registration papers. Forms for reidentifying are simple and can be filled out and signed within minutes after they are requested by electors.

Emergency Aid Insurance Company Declares Dividend

The Board of Directors of Emergency Aid Insurance Company declared a 5% dividend which was paid to all stockholders of the company on August 1, 1962, according to L. S. Rainer, Jr., President. The dividend was paid on August 10.

The Emergency Aid has expanded into the State of Florida and the management feels that this, the first dividend in recent years, is tangible evidence of the real progress the company has had through the combined efforts of their personnel, stated Rainer.

SPECIAL NOTICE

The Elba Clipper will not go into the mails, or be available, until Thursday morning at 7 o'clock each week in the future. The Clipper is dated for Thursday each week and though it has been the custom in the past that copies of the paper were available Wednesday afternoons, that policy is now being continued.

It is necessary that the publication date be changed to Wednesday if the paper is to be released on Wednesday afternoon or else not released until Thursday according to publication day, and date.

NEW HOME

Many old friends and relatives will be happy to know that after nearly forty years of marriage, Mr. and Mrs. A. C. Kirby (formerly Frances Bell) and children have built a spacious new home on the Alabama highway in La Crosse, Florida, and moved in to it August 7.
